## Using SlideShare to Share Presentations

Last updated: **28 May 2009**  
 Published in: [Finding and using digital media](#)  
 Tags: [delivery](#) | [e-learning](#) | [web services](#)

### Summary

This article provides an overview of a web service for uploading, embedding and sharing presentations called SlideShare. After a description of the features available we will look at its uses for teaching and learning.

### Introduction

SlideShare is a community web service that allows sharing and embedding of presentations that contain images, graphics, text and embedded video, created using PowerPoint, PDF or Open Office that are uploaded by the community. People wanting to share or publicise presentations such as those used at conferences and meetings are typical users of the service. The service provides a mechanism for soliciting feedback, which has uses for teaching and learning, and its ability to be embedded allows the community to distribute your presentations to a wider audience. Embedded presentations can be utilised as learning objects to supporting learning.

## WELCOME TO INTERNET FOR IMAGE SEARCHING

Lin

Would you like to learn how to use the Internet to find copyright cleared images for your work, quickly and efficiently?

Use this free, interactive tutorial to improve your image searching skills.

**Judge...**  
the pros and cons of using search engines to find images

**Discover..**  
financial and legal implications of using digital images

**Tour...**  
some key online image sites and collections

**Success...**  
stories to inspire you

This tutorial has been created by [JISC Digital Media](#) (the JISC Advisory service for Digital Media) and [Intute](#) as part of the Intute: Virtual Training Suite.

The tutorial was funded and supported by the [Academy](#) / [JISC](#) Collaboration.

Your guide is...
