

e-Learning Capital Programme

Tish Roberts
Programme Director

- JISC's core e-Learning programme aims to identify how e-learning can benefit learners, practitioners and educational institutions, and advise on its implementation.
- The e-learning activity within the Capital Programme will complement and build upon the core activities, with a focus on helping institutions to meet the diverse needs of learners throughout their lives.

- Improved quality of e-learning in the UK
 - **Practitioners** with confidence and skills in managing and facilitating e-learning in different contexts and with different pedagogic approaches
 - A **technical infrastructure** that supports flexibility, diversity and extendibility
 - Easy access to high quality, flexible **learning materials**
 - Effective and responsive e-learning **policies** systems and structures in place at local, regional and national level

e-Learning Capital Programme: key themes

- Lifelong learning
 - Delivering a personalised learning experience
 - Meeting the needs of individual learners
 - Supporting work-based learning
- Technologies that support:
 - Reflection, presentation of achievements, assessment, and collaboration...
 - ...in a more flexible way, taking into account learners' preferred tools and equipment
 - ...using more sophisticated admin

- MLEs for lifelong learning programme
- Distributed e-learning programme
- e-Learning and pedagogy strand's work on the learner experience
- e-Learning and innovation
- Work on the e-Learning framework and now the e-Framework

- Projects using technology to support lifelong learners in real contexts: collaborative & regional projects; HE in FE projects
- Technical development and implementation: reference models and demonstrators in key areas; including e-admin that supports learning and teaching.
- Collaborative activities with Academy Subject Centres on e-portfolios, sharing learning resources, e-learning tools, use of digitised resources
- Work with HE Academy to provide more effective information flow to sector on e-learning
- Work with research councils and the Higher Education Academy on e-Learning research

Pilot e-learning technologies that support Lifelong learning

- Widening participation, HE in FE
 - Work based learning
 - Flexible delivery
 - Personalised learning experience
-
- Build capacity, knowledge and skills
 - Technical models flexible, affordable and pedagogically diverse
 - Provide guidance
 - Greater understanding

(2006) (2007) (2008) (2009)
