

## Project activities

- iWOBLE – enables access to institutional systems to employers through changed processes
- induction is key – providing good support for learners e.g. WOLF
- PC3 – development coaching illuminate
- Proficiencies of students and emotions they experience of when using technology (e.g. WELL project) and of staff
- TELSTAR – (answer to too flexi for employers) uses Pebblepad to provide choices of modules – for employers to choose – not scary as completely negotiated - learning to employers
- PC3 – Personalised Curriculum Creation through coaching – ePortfolio for mapping professional competencies to evidence
- Co-genT – toolkit to support dialogue between academics and employers to identify the academic level at which learners are working. Development of learning outcomes in employers' language and a learner profile tool to support learners to meet the outcomes.
- EPPSME: technical infrastructure issues in work place: created a compatibility checker in Pebblepad. Sent to employers to check browsers, flash player version, firewall etc. (can solve issues beforehand)
