

JISC-CETIS

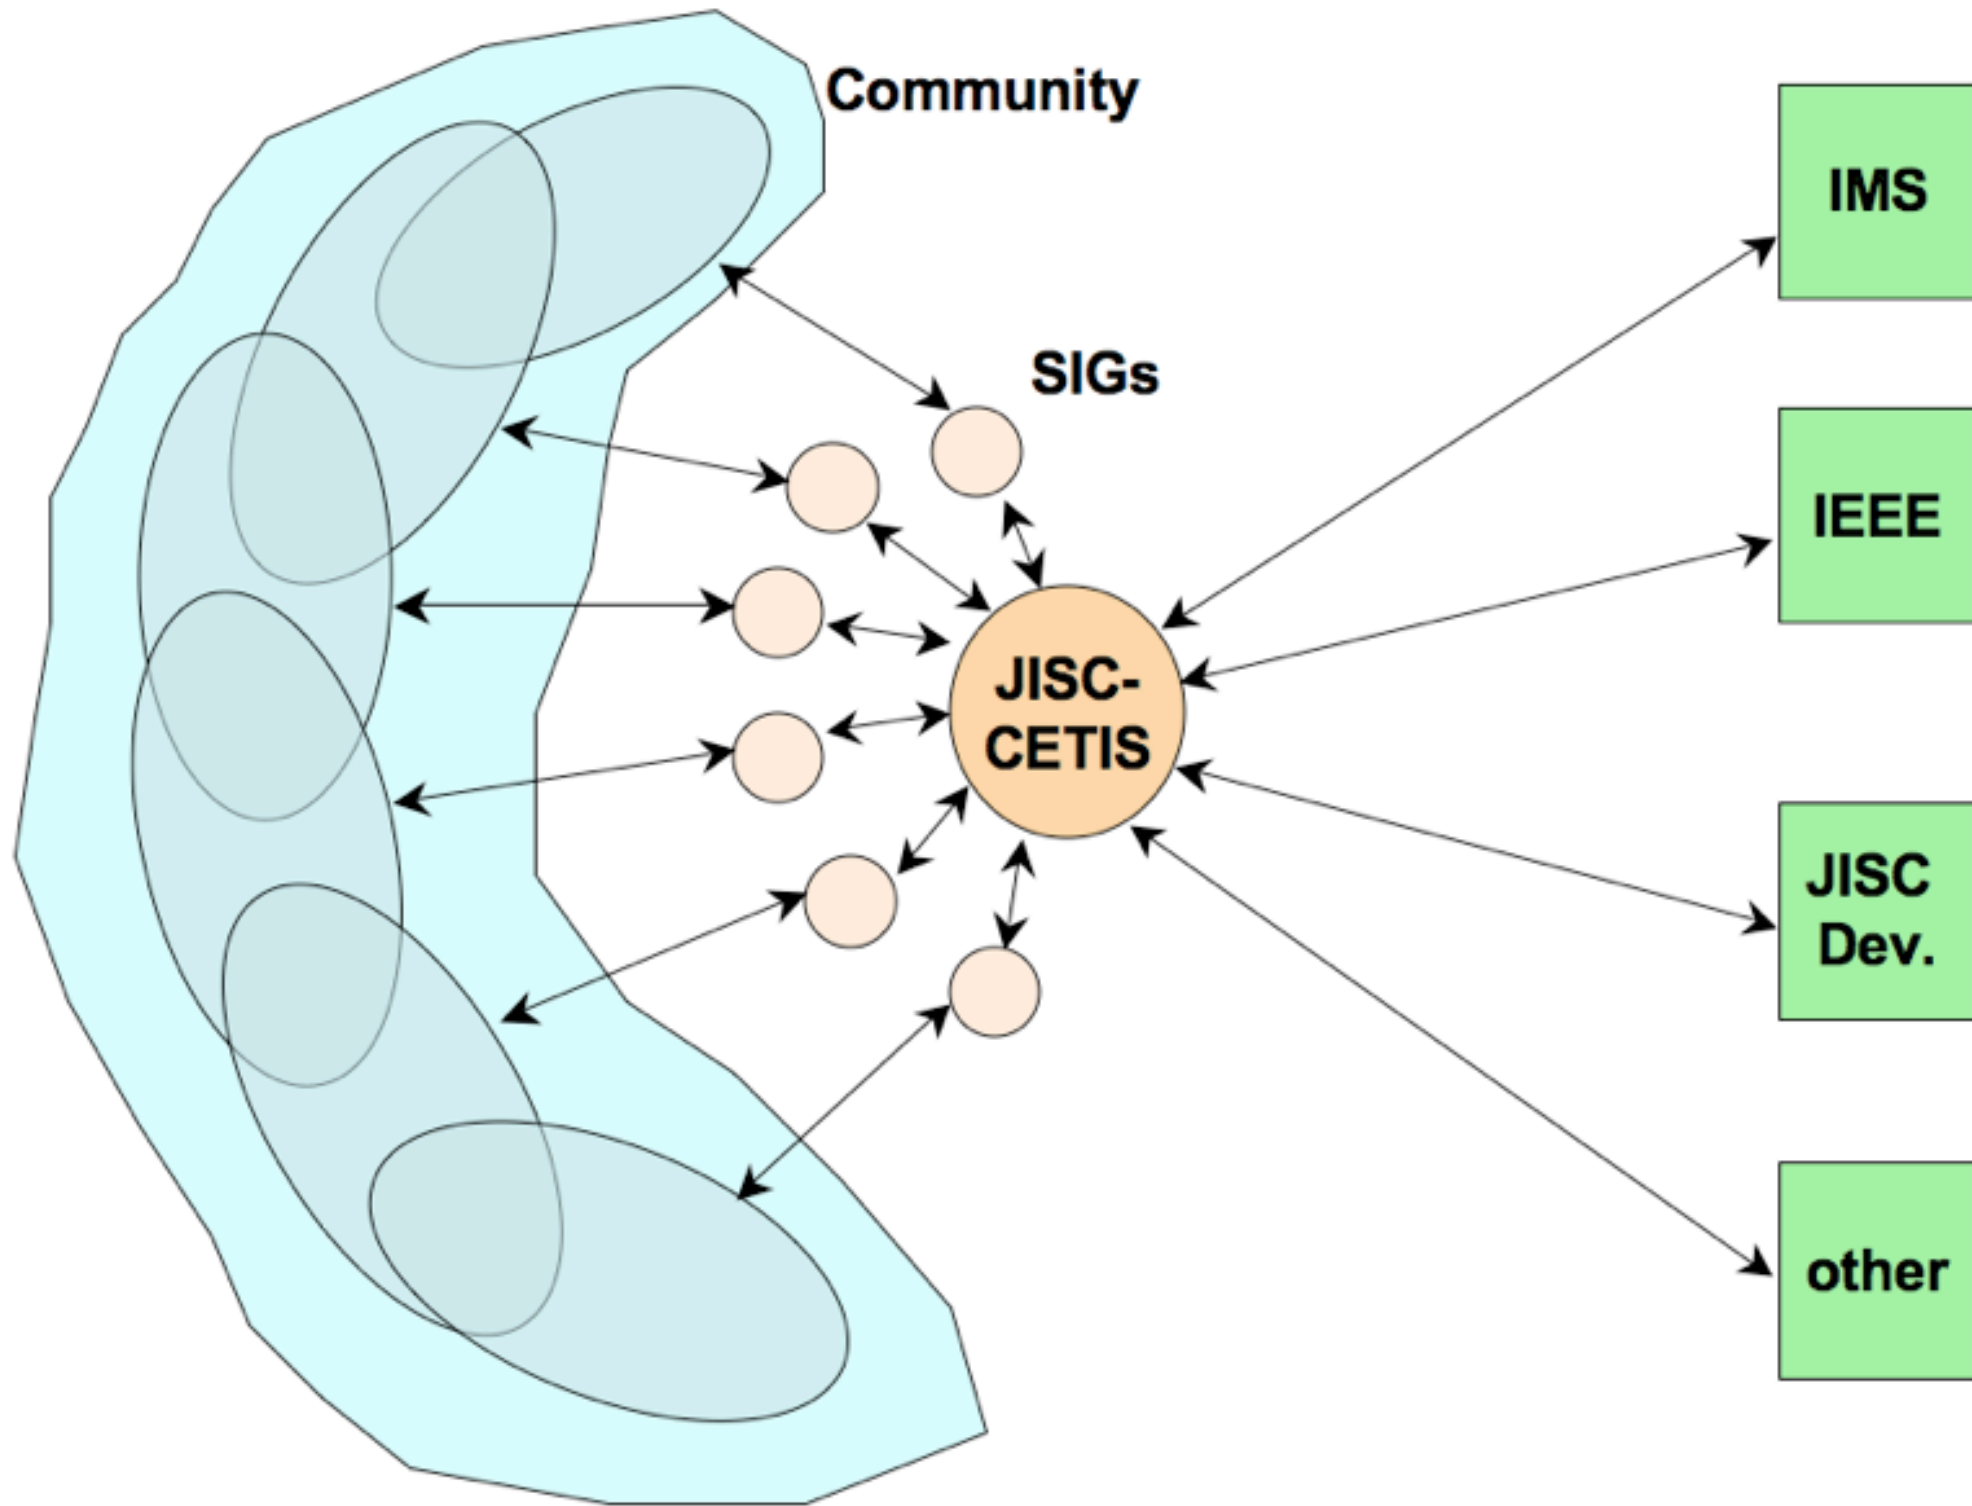

SIGs, Standards and Support...

Sam Easterby-Smith
se5@bolton.ac.uk

JISC-CETIS SIGs

- Formed in 2000
 - E-content, metadata & DR, Assessment, Portfolio, Enterprise, Accessibility, Pedagogy
- Bring together experts
 - And people with special interest
- Requirements gathering
- Review of current standards, tools, approaches
- Disseminate developments
- Each has a co-ordinator

SIIG role in programmes

Project support

- Understand projects' technical approaches and intervene EARLY with advice on standards and technology
- Invite projects to join appropriate SIIG meetings following successful bids
- Provide feedback to projects from community
- Facilitate peer review
- Identify training needs

SLG role in programmes

Programme support

- ITT drafting support
- Bid Marking
- Project review / final reports

Dissemination & sustainability

- Articles on E-Learning Focus and CETIS
Blogs - reporting on projects and the wider world of learning technology
- Fostering sustainability through OSMM

Portfolio SIG

Simon Grant and Helen Richardson

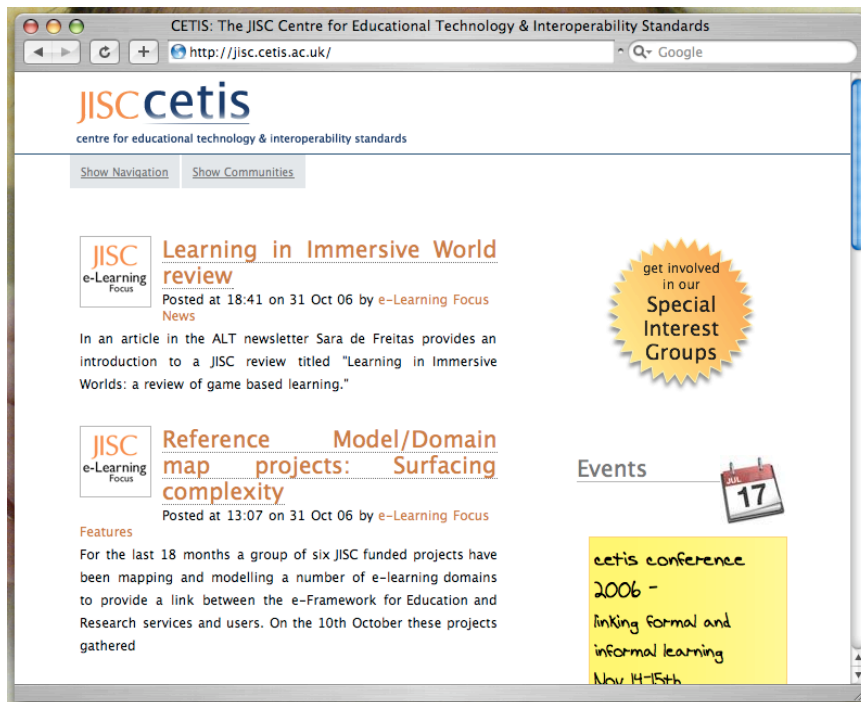

**Meeting on December 5th
in Chester**

JISC e-Learning Focus **Learning in Immersive World review**
Posted at 18:41 on 31 Oct 06 by e-Learning Focus
In an article in the ALT newsletter Sara de Freitas provides an introduction to a JISC review titled "Learning in Immersive Worlds: a review of game based learning."

JISC e-Learning Focus **Reference Model/Domain map projects: Surfacing complexity**
Posted at 13:07 on 31 Oct 06 by e-Learning Focus
Features
For the last 18 months a group of six JISC funded projects have been mapping and modelling a number of e-learning domains to provide a link between the e-Framework for Education and Research services and users. On the 10th October these projects gathered

30 Oct, 2006

Special Notice: Due to the launch of the new JISC web site many of the links from this site are currently unavailable. We apologise for this and hope to have the links restored soon.

This month - Domain maps, SOCKETS, R2Q2 and mash-ups

We report from the [final briefing meeting of the Reference Model/Domain map projects](#) which summarised what the projects have produced and how their work will be taken forward in the Capital Call projects. We feature an article by Andrew Booth and Brian Clark on [SOCKET](#), a toolkit project which could provide the answer for those wanting to plug-in new web services into existing legacy systems. Gary Wills and Lester Gilbert describe the [R2Q2 toolkit](#).
