

JISC CETIS Conference Planning

Title: Draft – e-Framework – priorities and challenges for 2006
Organised by JISC and CETIS

Dates: 15 and 16th November

Venue: Edinburgh Conference Centre, Heriot Watt University

Who should attend

Attendance is by invitation only. 200 places are available.

- SIG members
- JISC project staff
- Invited guests

Why they should attend

- To understand the role and importance of reference and domain models as a means of connecting technical development with domain requirements
- To have an opportunity to contribute to and influence a topic they have an interest in
- To find out where other projects and individuals think we are heading
- To have a say
- To find out what CETIS is going to do about topics they are interested in
- To brainstorm and generate ideas
- To make useful contacts
- To share experiences
- To ask questions and get answers

At the conclusion of the conference, attendees should:

- Feel that their opinions matter

- Feel that they can have an influence on CETIS, and over the directions that standards take
- Feel part of a community
- Understand where, as a community, we're going
- Know where they don't know enough, and where they can find out more
- Know what actions are going to be taken next
- Know who to ask for help

Aims

- Identify priorities and challenges for the near future (2006)
- Get feedback from community
- "Reality check"
- Generate ideas and creative solutions to explore
- Support inter-project collaboration and shared vision
- Identify areas of interest that cross over current programme/SIG boundaries
- Decide **practical** and **immediate** measures that CETIS/JISC can and should take
- Identify gaps in standards, or standards CETIS should be doing more with

Website

The Conference website ("online conference") needs to support the following:

- Registration
- Summary of event
- Summary of themes
- Directions
- Note taking space/blog for facilitators
- Comment space for attendees
- Photo blog for during the event

Themes (provisional)

Each theme should have at least one submitted paper on a reference model with a presenter; more might be good, but at least one is sufficient. You need to have a good mix of listening, and brainstorming.

Presentations by Reference Model projects

Where a RM project has a good fit with a theme, they should be invited to present – this is crucial.

Theme 1: ePortfolios

- ePortfolios
- Personal, personalised, and customized environments
- Accessibility
- Ownership, verification, privacy
- Standards for portfolio exchange
- Standards for portfolio aggregation

Theme 2: Repositories

- Personal repositories
- Personal publishing, tagging, alerting
- Podcasting
- Folksonomies
- Licensing and rights issues
- Standards for publishing resources
- Standards for distributed discovery

Theme 3: Learning Design

- Items tbc

Theme 4: Assessment

- Items tbc

Theme 5: Personal learning and research environments

- Items tbc

Theme 6: Institution-level system integration

- Course information – XCRI project
- Curricula
- Quality management
- Accreditation
- Admissions and enrolment
- Finance and fees
- Administration
- Web services
- Workflow

Theme 7: Collaboration and innovation

- Social software
- Social bookmarking
- Reputation and “friending”
- Blogging
- Digital identities
- Wikis and knowledge construction
- Simulation and games
- Standards for social software, identity, and social networks

Plenary items

These should be presented in 20 minutes, covering the aspects of the theme discussed in the working session.

Day 1	Theme 1: e-Portfolios	Theme 2: Repositories	Theme 3: Learning Design	Theme 4: Assessment	Theme 5: PLE/PRE	Theme 6: Integration	Theme 7: Innovation
Facilitated by...	Peter, Sharon	Lorna, Phil	Lisa, Sheila	Rowin, Niall	Oleg, ???	Vashti, Sam	Scott, Wilbert
