

JISC KM Roadmap

Presentation at All Hands Meeting

Nottingham

20 September 2005

About TFPL

- Information and knowledge management business consultancy, training, recruitment and research
- Experience across various sectors
- Established important KM networks and events
- Authored important KM reports and publications
- Details at <http://www.tfpl.com>

Drawing the JISC KM Roadmap

- We have been commissioned to:
 - Prepare a KM roadmap to inform planning and decision making by JCSR and JIIE
 - Describe what KM tools and methods are being offered and are in use by e-Science stakeholders and related communities
 - Develop a number of workshops to build consensus around what could most usefully be done next
 - Create a KM glossary that defines key KM terms, standards and acronyms in use in the e-Science community and indicates different uses within that community

What we propose to do first

- Background research to find out what's gone before and what's in progress now
- Talk to as many JISC stakeholders as we can in the time available through
 - Workshops
 - Interviews
- If you'd like to contribute, please talk to one of us after this session or take a card and mail/phone us later

What we would like to explore

- How you understand KM in the context of e-Research and e-scholarship
- How you understand KM from the perspective of people, processes, content and technology
- The distinction between information and knowledge management in your sector

How to contact us

- Speak to one of the team here today
- E-mail the TFPL Project Team –
angela.abell@tfpl.com
john.davies@tfpl.com [project manager]
sandra.ward@tfpl.com

or call us at TFPL on 020 7251 5522
