

Project clusters

These clusters will aid in the management of the programme but will also serve as focal points for other organisations and interested parties to become involved in FAIR and to contribute to the success of the programme.

Not all partners will attend all cluster meetings but it is intended that grouping projects in this way will help to maximise evaluation and dissemination to the many varied communities that potentially will benefit from FAIR.

E-prints and e-theses cluster

- DAEDALUS
- e-prints UK
- Electronic Theses
- HalRST
- SHERPA
- TARDis
- Theses Alive!

Museums and Images cluster

- Accessing the Virtual Museum
